

TOP 10 REASONS Pet Parents Should use a Kinn Kleanbowl™

- 10** Over 1,000,000 dangerous germs are in their pet's food/water bowls including E.coli, Salmonella, Staph/Aureus, and/or Yeast/Mold.¹
- 9** Soap & hot water **DO NOT** get hot enough to kill Salmonella, often E.coli, and other dangerous germs.²
- 8** Dishwashers **DO NOT** get hot enough to kill Salmonella and other dangerous germs.³
- 7** Bleach and disinfectants **DO NOT** kill all dangerous germs, and are toxic to animals/environment.⁴
- 6** Water fountain carbon filters and paper food trays spread germs, while biofilms in ordinary water bowls team with dangerous germs.⁵
- 5** Pets with compromised immune systems – including puppies, kittens, senior pets, and sick pets – are especially vulnerable to infections from bacteria and viruses from pet bowls.⁶
- 4** Germs in pet bowls contribute to finicky eating, poor nutrition, and dehydration as dogs and cats can smell germs.⁷
- 3** Germs in bowls also are associated with 3 of the top 6 reasons Vets see a pet including stomach upset, diarrhea, intestinal inflammation, etc.⁸
- 2** Germs from teeth & gums ingested through the blood stream cause disease and organ failure affecting your pet's heart, brain, lung, kidney and liver. This can take 4 years off your pet's life.⁹
- 1** Your pet is family, your pet is Kinn, and deserves a long, healthy life. Kinn Kleanbowl: Germ-free, guaranteeing healthier hydration, nutrition, and quality of life.¹⁰

KLEANBOWL BONUS: Recycling sugar cane fiber refills into the paper stream creates **LESS WASTE** than dishwashers by saving electricity, greenhouse gases, and virgin paper materials.¹¹
