

Board & Train Spotlight

The Story of Duncan

Duncan was a 2-year-old King Charles Spaniel that had no history of violent outbursts, like biting, until one day Duncan bit a small child. Completely out of character for Duncan, the family was distraught as they now feared they'd have to put their beloved family member to sleep.

After a frantic call to A Closer Bond, Katy Cushing knew exactly what to do.

Duncan was immediately enrolled in a 4-week rehabilitation obedience training program. This residency program is designed to completely submerge pets into a challenging but rewarding obedience program.

With a focus on distractions, perception modifications, and behavior training Duncan and his parents quickly became hopeful that Duncan would be able to be reformed. Upon completion of training, Duncan became a happier dog that never bit anyone again.

HOW Board & Train Works:

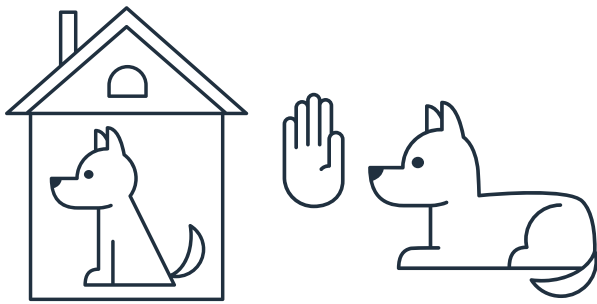

- 1-4 weeks overnight training for enough time to achieve desired results
- One trainer, one consistent approach, one environment
- Tailored solutions
- Social development
- Training for pet parents too
