

Kinn Inc & OPARC are working together to transform local communities and provide one-of-a-kind opportunities to developmentally disabled adults. Together we are helping to make a happier, healthier, and safer planet for people and pets.

Timmy has been with OPARC for over 21 years, Timmy never stops developing work skills and relationships.

Timmy enjoys working in OPARC's Work Activity Program where participants receive vocational training and skills, speech therapy, paid work experience, and individual case management services. He currently works in general assembly and packaging and loves his job.

OPARC SUCCESS STORIES

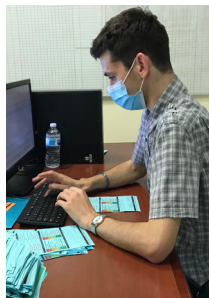

The OPARC mission is to support, employ, and transform the lives of people with disabilities.

Justin participates in the OPARC Explore program. During the hiatus of usual programs due to COVID, he requested to purchase a tablet for himself so he could join in the OPARC group Zoom calls.

There has been an incredibly positive shift in his engagement. "During the time he has been at home, his communication skills, as well as his confidence with speaking and engaging, have

skyrocketed." He has greater confidence and giving more detailed answers than ever before. These skills will serve him well with future employment.

William joined OPARC in 2018 and attended every job prep class and meeting with his Job Developer at OPARC.

In 2019, a Paid Internship Program (PIP) was developed for him at Nestle, where he started a paid internship in August, 2019. Three months later William was hired directly by Nestle and he remains competitively employed there to this day. His primary job

duty is centered on data entry. His supervisors at Nestle speak very highly of William and his work ethic.

Kinn has been working with OPARC since 2014. Our team values our partnership, and looks forward to an ongoing relationship for many more years to come. For more information visit kinninc.com.

Kinn creates stronger bonds between people and pets through revolutionary products designed to improve the quality of life for people, pets, and the planet.
